Reference 1 - 7.50% Coverage

"My other concerns are that the police haven't engaged with their own internal expert team and nor with the Office of the Privacy Commissioner." He said it was unclear where the identification data such as Māori tā moko would be stored.
"Will it be stored in New Zealand? Will it be stored overseas? Who will have access to those images? More importantly, the staff who are using the system, how will they differentiate the different patterns, Māori patterns?

Reference 2 - 4.46% Coverage

Dr Taiuru wanted to know how police would accumulate that large number of prints and whether they were justified in doing so.
"I find it very concerning that they're going ahead and now they're looking for more intimate information about individuals without consultation."

<Files\\Processed x Highly relevant\\2024-06-17 - RDP - How much are councils, govt de> - § 8 references coded [8.31% Coverage]

Reference 1 - 1.26% Coverage

A Government department has blocked staff from using ChatGPT and similar ungoverned open generative AI tech to protect its data and systems as the Government develops a plan for the use of Artificial Intelligence. .

Reference 2 - 0.99% Coverage

Chief data officer Puawai Wereta said it had a fundamental responsibility as a government agency to protect the â€œinformation provided to us by the people we supportâ€ .

Reference 3 - 0.80% Coverage

BIE would continue to block AI until it could ensure the appropriate security and privacy measures to â€œprotect our data and systemsâ€ .

Reference 4 - 0.69% Coverage

It had strict checks and balances in place to mitigate potential risks, especially around data protection and privacy.

Reference 5 - 1.14% Coverage

â€œWe have established an AI staff network to build internal expertise which is made up of key individuals from various teams, and includes digital, legal, privacy, and security representatives.â€

Reference 6 - 0.47% Coverage

AI could potentially create greater efficiencies but there were privacy concerns.

Reference 7 - 0.66% Coverage

He acknowledged privacy concerns were valid since the government held a lot of personal information about people.

Reference 8 - 2.31% Coverage

A Privacy Commission spokesperson said while technologies bring significant benefits to individuals and agencies, they also introduced new and novel privacy risks that need to be managed. Examples included leaking of personal information in AI outputs, impersonation and fraud, nonconsensual fake images, audio and video, and automated decisions based on incorrect information or biased processing.

Reference 1 - 5.09% Coverage

The guidelines were grouped into the following themes: privacy and security; access and equity; ethical use and social responsibility; transparency; accountability; mÄ tauranga MÄ ori and MÄ ori data sovereignty; and research publishing and ethical research conduct.

Reference 2 - 2.39% Coverage

Dr Marta Rychert wanted more examples of how it could be used so there was clarity about issues such as privacy and security.

<Files\\Processed x Highly relevant\\2024-08-01 - GHT - Cameras cause delay Councillor> - § 1 reference coded [10.01% Coverage]

Reference 1 - 10.01% Coverage

â€œThe cameras themselves are easy. It is the AI [artificial intelligence] that reads information off that, and we give this to suppliers, so we just have to make sure that information isnâ€™t given to third parties,â€ Hadfield said. â€œThe moment we get the [okay] that the information wonâ€™t be sent to third parties, then the cameras will go up.â€ Hadfield said the policy also ensured that the cameras only pointed at the road and not at private houses.
Councillor Teddy Thompson and deputy mayor Josh Wharehinga said Grey St had been there for some time and people would be upset the trial had not started.
â€œHow does the delay in the cameras being installed materially impact the trial period?â€ Wharehinga asked. The report says the installation was completed in late July. I would have expected the trial to start then.

<Files\\Processed x Highly relevant\\2024-08-20 - RNZ - NZ Police finally has facial r> - § 2 references coded [2.19% Coverage]

Reference 1 - 1.56% Coverage

"This policy ensures that appropriate safeguards are in place for Police's use of FRT and the storage of personal information, and that use of FRT is lawful, proportionate, and appropriate in a New Zealand

policing context."

Reference 2 - 0.63% Coverage

The local policy said proportionate use would need to account for human rights and privacy.

<Files\\Processed x Highly relevant\\2024-08-21 - RNZ - ACC sees benefits in using AI> - § 1 reference coded [4.06% Coverage]

Reference 1 - 4.06% Coverage

ACC said it had done a privacy risk assessment, a privacy impact assessment, an ethics review, and security assessment and testing on the AI.

<Files\\Processed x Highly relevant\\2024-08-23 - PST - AI could threaten $572m of NZ> - § 1 reference coded [3.64% Coverage]

Reference 1 - 3.64% Coverage

â€œMost of the worldâ€™s not rushing to regulate [AI] ... What we donâ€™t want to do is to try and stop innovation, but at the same time, we need to protect peopleâ€™s privacy, understand who owns that data, and also how itâ€™s used. So what weâ€™re trying to do is encourage the use, but at the same time, not to have any abuses of that.â€

<Files\\Processed x Highly relevant\\2024-10-15 - BOP - Homegrown AI tool can help del> - § 2 references coded [4.01% Coverage]

Reference 1 - 2.20% Coverage

Datacomâ€™s Enterprise AI Assistant was developed in-house after research revealed many organisations were interested in introducing AI, but were held back by security and other concerns

Reference 2 - 1.81% Coverage

Another barrier to AI updates has been ambiguity about where data resides, whether it can be used to train AIs, and the levels of attendant privacy risk.

<Files\\Processed x Highly relevant\\2024-12-06 - STF - Next-gen AI is on its way for> - § 1 reference coded [1.94% Coverage]

Reference 1 - 1.94% Coverage

The International Organisation for Standards published its first AI standard last year, providing guidance on how and when businesses should consider AI procurement, development and deployment, the sorts of decisions AI might make, and aspects such as privacy and data.

<Files\\Processed x Highly relevant\\2025-01-09 - SCP - Trailblazer On Upskilling Kiwi> - § 2 references coded [4.24% Coverage]

Reference 1 - 2.24% Coverage

He also had advice for local councils using AI: be cautious and risk averse. For example, public servants

should not send information to AI that they would not want on a website, Browning said.

Reference 2 - 2.00% Coverage

The council finalised a generative AI policy in March to guide staff and encourage its use while protecting the council's safety, privacy, and intellectual property rights.

<Files\\Processed x Highly relevant\\2025-01-28 - RNZ - Government releases artificial> - § 2 references coded [7.34% Coverage]

Reference 1 - 1.98% Coverage

"Privacy, security and ethical risks need to be carefully considered."

Reference 2 - 5.36% Coverage

The existing guidance recommends not using it for any data classified sensitive or above, or for critical operations, and to avoid where possible putting any personal data into GenAI tools.

<Files\\Processed x Highly relevant\\2025-03-01 - SCP - MPs Instructed To Remove Four> - § 2 references coded [14.98% Coverage]

Reference 1 - 12.50% Coverage

"The decision was taken following discussions with our partners across New Zealand government and internationally," GonzalezMontero said.
"Based on this information, and our cybersecurity analysis, the Parliamentary Service Commission determined that the risks [posed by these applications] are not acceptable in the current New Zealand parliamentary environment."
National MP Carlos Cheung, a WeChat user, said the ban did not affect him as he only downloaded apps on a personal device before using them on a private network.
"There are a lot of apps I try to avoid using on the parliamentary phone because we understand that devices can sometimes access certain security areas," he said. "As a member of Parliament, cybersecurity is one of the things we look into." Cheung said the ban was an effective measure to mitigate potential security risks. "All these new programs, apps and technology coming up, there is always a potential risk," he said.
"Sometimes it's very hard for us to follow up with every application or program to ensure our safety," he said. "We don't want to have any information leaking out and harming our country." Nationa

Reference 2 - 2.48% Coverage

Some Western nations have raised concern the Chinese government can access sensitive user data through apps such as TikTok. However, TikTok has denied that data or algorithms can be accessed or manipulated by Chinese authorities.

<Files\\Processed x Highly relevant\\2025-03-09 - SCP - AI Could Enhance Democracy - E> - § 1 reference coded [3.76% Coverage]

Reference 1 - 3.76% Coverage

The proposal was not supported by all councillors, with Crs Genevieve Robinson and Paul Dietsche raising concerns about cyber security and the amount of energy AI requires.

<Files\\Processed x Highly relevant\\2025-03-20 - WKT - Good luck getting a job withou> - § 1 reference coded [1.80% Coverage]

Reference 1 - 1.80% Coverage

AI tools are only as useful as the data they are training on, and privacy and the natural inclination of commercial businesses not to share data is a barrier in a wide range of more far-reaching applications.

<Files\\Processed x Highly relevant\\2025-04-06 - STF - AI is like having a high-perfo> - § 1 reference coded [1.26% Coverage]

Reference 1 - 1.26% Coverage

"Thereâ€™s resistance to putting data into tools like ChatGPT, even while the same firms use Microsoft 365 or unsecured email every day. The concern is valid, but the inconsistency is striking,â€ says the barrister.

<Files\\Processed x Highly relevant\\2025-04-29 - RNZ - Police trial data extraction t> - § 1 reference coded [0.99% Coverage]

Reference 1 - 0.99% Coverage

Controls were in place to " avoid data leakage to external parties".
