Reference 1 - 3.64% Coverage

â€œMost of the worldâ€™s not rushing to regulate [AI] ... What we donâ€™t want to do is to try and stop innovation, but at the same time, we need to protect peopleâ€™s privacy, understand who owns that data, and also how itâ€™s used. So what weâ€™re trying to do is encourage the use, but at the same time, not to have any abuses of that.â€

Brudvik-Lindner said there was â€œno doubt there are going to be bad actors who manipulate AI for bad usesâ€ .
But it was foolish to try to figure out what all the bad uses were before starting to experiment with AI - which could also do many constructive things, he said.

<Files\\Processed x Highly relevant\\2025-01-28 - RNZ - Government releases artificial> - § 1 reference coded [4.45% Coverage]

Reference 1 - 4.45% Coverage

"AI is evolving rapidly and if inaccuracy or misuse were to cause failure in public service delivery, the consequences could be serious," the framework said.
