Deep Utopia is structured in three weaving threads: a series of six lectures given by a fictitious Nick Bostrom, a dialogue between the people attending the lectures and the assigned readings, which included letters written by a fox and the story of ThermoRex, a heater.
Bostrom says the book considered the challenges that could come up once the AI alignment problem was solved â€" â€œwhat happens if things really go rightâ€ .

In his 2021 book Scary Smart Mo Gawdat, formerly chief business officer of Google X, predicts that by 2049 AI will be a billion times smarter than the smartest human. The gap in intelligence would be similar to that between a fly and Einstein, leading Gawdat to ask, how do you convince the superbeing not to squash the fly?
