The guidelines were grouped into the following themes: privacy and security; access and equity; ethical use and social responsibility; transparency; accountability; mÄ tauranga MÄ ori and MÄ ori data sovereignty; and research publishing and ethical research conduct.

<Files\\Processed x Highly relevant\\2024-08-19 - RNZ - AI to deal $570m blow to Austr> - § 1 reference coded [6.74% Coverage]

Reference 1 - 6.74% Coverage

More than three quarters of Māori members surveyed - 76 percent - believed that AI could lead to an increase in cultural appropriation. APRA AMCOS manakura puoro Māori Dame Hinewehi Mohi said unregulated AI technology was a "particular threat" to Māori music.
"The potential for AI to lead to cultural misappropriation is massive. Maintaining the cultural integrity of Māori musical traditions and taonga puoro is important to our Māori members."

Reference 1 - 1.02% Coverage

The policy does not mention Māori or Te Tiriti at all. RNZ has asked police why not. Māori lawyers have said Māori consider biometrics a taonga.

Reference 2 - 3.86% Coverage

Police said: "As part of the development of the policy, it was shared with the understanding policing delivery independent panel. We sought input from our internal Māori, Pacific, and Ethnic Services group, as well as Māori members of the expert panel on emergent technologies.
"We have also kept the Office of the Privacy Commissioner informed throughout the process and are in regular contact with them on. There is broader work in progress around how police treat Māori data, which is also an ongoing conversation across many government agencies."

Reference 1 - 1.78% Coverage

Next year the ageing Copyright Act will finally be reviewed by the Government, and no doubt AI will be considered as part of this, along with MÄ ori data sovereignty.

<Files\\Processed x Highly relevant\\2024-09-05 - TAM - Peter Lucas Jones joins Zuc> - § 2 references coded [3.57% Coverage]

Reference 1 - 1.56% Coverage

Time Magazine said Jones and his team had focused on ensuring Māori communities retained ownership and control over their digital data.

Reference 2 - 2.01% Coverage

“In the digital world, data is like land,” he explained. “I f we don’t have control over our data, we risk losing our identity in this new digital landscape,” Jones told Time.

<Files\\Processed x Highly relevant\\2024-09-06 - NAD - Te Hiku CEO on top 100 list al> - § 2 references coded [4.36% Coverage]

Reference 1 - 2.24% Coverage

â€œIn the digital world, data is like land,â€ he said. â€œIf we do not have control, governance, and ongoing guardianship of our data as indigenous people, we will be landless in the digital world, too.â€

Reference 2 - 2.11% Coverage

â€œThis is about Mana motuhake: being in control of oneâ€™s destiny, and growing an economic future for your people when that has largely been diminished through the process of colonisation.â€

<Files\\Processed x Highly relevant\\2024-09-09 - WAA - Peter Lucas Jones ranked wi> - § 2 references coded [5.85% Coverage]

Reference 1 - 3.50% Coverage

Mr Jones says the technology must be owned by and directly benefit Mā ori because, in the digital world, data is l ike land.
“I f we do not have control , governance, and ongoing guardianship of our data as Indigenous people, we wi l l be landless in the digital world, too.”

Reference 2 - 2.35% Coverage

“This is about Mana motuhake: being in control of one’s destiny, and growing an economic future for your people when that has largely been diminished through the process of colonisation.”
