Reference 1 - 1.67% Coverage

In an exercise in California with six nations in March, a F35 jetfighter with AI-driven sensors instantly passed targeting data along the "kill chain" to an unmanned kamikaze drone.

Reference 2 - 5.03% Coverage

In another exercise - also attended by New Zealand - the controversial surveillance firm Palantir supplied a so-called "metaconstellation" of submarine-hunting satellites. US military chiefs said they were getting to the point where the combined forces can join up their technology in a "kill web". "We've always aspired to get this 'kill web'-type of capability as a joint and combined force, and we're starting to get to that point," said the US commander of the "global information domination" exercises (GIDE) New Zealand has been part of.

Reference 3 - 1.96% Coverage

The New Zealand government recently shut down an expert advisory group on killer robots. The NZDF and the goverment have prioritised "interoperability" with our allies' systems and technology, documents show.

Reference 4 - 4.03% Coverage

It shows drones "trying to find targets far out of view", with a "pretty much instant, almost autonomous" link back to targeters.
The British said the "major war-fighting experiment" with six partner nations, including New Zealand, was with "cutting-edge systems and technologies, designed to help make the British Army more lethal on the battlefield".
"Joint kill chains were reduced from minutes to seconds," reported enthusiasts.

Reference 1 - 6.25% Coverage

The system is designed to be used in different agricultural settings with a unit that can be fitted to any tractor or robot to navigate vineyards, orchards, a field growing vegetables or pastures. The trained AI can distinguish between different species of weed, so it targets only unwanted plants.

<Files\\Processed x Highly relevant\\2024-09-11 - MWS - Reducing herbicide usage one z> - § 1 reference coded [2.05% Coverage]

Reference 1 - 2.05% Coverage

â€œWe have the AI which is smart, and the laser which is smart, but these are not the smartest part of this product. What is the smartest is the integration, so these two can talk to each other.â€

<Files\\Processed x Highly relevant\\2024-09-21 - RNZ - ACC trial of artificial intell> - § 1 reference coded [1.25% Coverage]

Reference 1 - 1.25% Coverage

Microsoft is promoting what it calls "an everyday AI companion. We are building Copilot into all our most used products and experiences".

<Files\\Processed x Highly relevant\\2024-09-22 - NSM - Unmanned vessel makes waves wi> - § 1 reference coded [2.39% Coverage]

Reference 1 - 2.39% Coverage

While operating with 20 or 30 other vessels in close proximity, the system could work out in milliseconds the best way to move between them all.

<Files\\Processed x Highly relevant\\2025-01-09 - TST - DB Breweries adds AI into mix> - § 1 reference coded [5.25% Coverage]

Reference 1 - 5.25% Coverage

The technology determines and lets the forklift operator know where there is a person. It can differentiate between a post or an object and what is a human, whether moving or static. It then decelerates the forklift to a low speed of 2kph, as well as sounding the alarm, so that even if the forklift operator hasnâ€™t seen the person, the system will basically interrupt.

<Files\\Processed x Highly relevant\\2025-03-18 - RNZ - The future of warfare- Killer> - § 1 reference coded [2.26% Coverage]

Reference 1 - 2.26% Coverage

The other big push was to integrate allies more. New Zealand, Australia, Japan, the Philippines and France are all taking part this month and next in the US Army's main high-tech testing exercise,Project Convergence-Capstone 5 (PC-CP5) at five sites around the Pacific. "Integration of our forces is key to winning in the future," the US said.
