<Files\\Processed x Highly relevant\\2024-05-08 - NZH - Kiwis driving start-up gets $1> - § 1 reference coded [1.29% Coverage]

Reference 1 - 1.29% Coverage

The software takes advantage of cameras, sensors and other modern car technology to see and react to various driving environments

<Files\\Processed x Highly relevant\\2024-07-28 - NZH - Has Soul Machines missed AI bo> - § 1 reference coded [1.18% Coverage]

Reference 1 - 1.18% Coverage

The idea was to create digital on-screen â€œhumansâ€ who could help firms with customer service, complete with facial expressions to empathise with a customerâ€™s emotions.

<Files\\Processed x Highly relevant\\2024-08-03 - RNZ - The huge playground of AI musi> - § 1 reference coded [5.15% Coverage]

Reference 1 - 5.15% Coverage

"In the last 10 or more years, there's been this relentless surge of progress [and] technical advance in the capability of AI systems. The most obvious evidence of that is in the language model stuff - Chat GPT and those AI language models - because they are so startlingly lifelike and humanlike in their response and in their ability to do basic logic.

<Files\\Processed x Highly relevant\\2024-08-20 - RNZ - Autonomous mowers in school fi> - § 1 reference coded [2.03% Coverage]

Reference 1 - 2.03% Coverage

A mower could respond to the owner talking into a phone from anywhere in the world, with more to come courtesy of AI.

<Files\\Processed x Highly relevant\\2024-09-11 - PST - AI project aims to reduce chat> - § 1 reference coded [2.67% Coverage]

Reference 1 - 2.67% Coverage

â€œAnyone should be able to access important information in a way thatâ€™s most intuitive to humans â€" natural conversations in their preferred language,â€ she said. â€œGovGPT is a first step.â€

<Files\\Processed x Highly relevant\\2024-09-18 - STF - Peter-Lucas Jones recognised f> - § 2 references coded [3.79% Coverage]

Reference 1 - 2.42% Coverage

â€œOur tools are natural language processing tools. We have an automatic speech recognition system, which is the best in the world for transcribing te reo MÄ ori. We also have a speech synthesis tool, and a pronunciation feedback model.â€

Reference 2 - 1.37% Coverage

â€œThese tools are going to be hugely important if we think about how we address language acquisition in a digital sense,â€ Jones said.

<Files\\Processed x Highly relevant\\2024-09-22 - NSM - Unmanned vessel makes waves wi> - § 1 reference coded [2.34% Coverage]

Reference 1 - 2.34% Coverage

The artificial intelligence technology could take in different inputs, such as charts, and make decisions far more quickly than humans could.

<Files\\Processed x Highly relevant\\2024-10-17 - SCP - NZQA To Trial Computer-marking> - § 1 reference coded [2.90% Coverage]

Reference 1 - 2.90% Coverage

"Automated text scoring uses machine learning to recognise the characteristics of a piece of text to mark other similar responses."

<Files\\Processed x Highly relevant\\2024-10-23 - TDN - Kiwi AI business making waves> - § 1 reference coded [4.36% Coverage]

Reference 1 - 4.36% Coverage

ListAssist provides an AI-powered home search platform that allows buyers to use natural language to search for properties more easily, and without having to navigate filters and dropdowns.
This means a buyer can simply type in their wishlist of home characteristics, such as â€œbig house with large garden and garageâ€ , into an agencyâ€™s website, and get instant results.

<Files\\Processed x Highly relevant\\2024-12-04 - NZH - The rapid rise and rise of> - § 4 references coded [5.28% Coverage]

Reference 1 - 1.71% Coverage

Generative AI works by drawing on a vast amount of data including text from books, articles, websites and other written sources. The software analyses patterns and structures in the source material then responds using natural sounding language.

Reference 2 - 0.79% Coverage

Other generative AI tools use similar databases to create new images, write music and computer programming code.

Reference 3 - 2.16% Coverage

The company makes what it calls â€œdigital humansâ€ . These are avatars that are often used by companies to handle customer equities on video calls. Soul Machinesâ€™ digital humans are able to interpret human emotions during a conversation by analysing facial expressions, tone of voice and language context.

Reference 4 - 0.62% Coverage

This gives them the information they need to provide appropriate responses in real time.

<Files\\Processed x Highly relevant\\2025-01-09 - TST - DB Breweries adds AI into mix> - § 1 reference coded [9.47% Coverage]

Reference 1 - 9.47% Coverage

Curphey described the technology that has been implemented, which uses cameras, alarms and automatic speed reduction to reduce the reliance on human reactions to hazards, as â€œcutting edgeâ€ .
The AI system gathers data that is then used to track, analyse and continually improve site safety.
The technology determines and lets the forklift operator know where there is a person. It can differentiate between a post or an object and what is a human, whether moving or static. It then decelerates the forklift to a low speed of 2kph, as well as sounding the alarm, so that even if the forklift operator hasnâ€™t seen the person, the system will basically interrupt.

<Files\\Processed x Highly relevant\\2025-02-25 - TAM - Te Matatini AI and online h> - § 1 reference coded [1.97% Coverage]

Reference 1 - 1.97% Coverage

AI systems can be designed to perform speci~c tasks, like translating languages or identifying objects in images, or more complex functions that require adapting to new situations.
