Reference 2 - 3.25% Coverage

"There have been times where I haven't been able to make a meeting, but I've got colleagues who are going to be in that meeting already and I can just send my AI to that meeting for me, collect notes, then read those notes afterwards and understand everything that happened, a lot more quickly then watching an entire video call played back."

Reference 3 - 1.12% Coverage

RNZ recently reported hundreds of GPs were using some AI note-taking programmes during consultations to ease workload.

<Files\\Processed x Highly relevant\\2024-07-16 - RNZ - New app uses avatars as digita> - § 2 references coded [13.48% Coverage]

Reference 1 - 6.82% Coverage

A small tech company is working on an app it hopes could act as a digital mentor for children and encourage them to get outdoors.
Avatars Global has partnered with a US company to create a smartphone game with thousands of lifelike characters to pick from, which a child can then interact with.
The app would set challenges - going for a walk, or picking up a bag of rubbish - which a child could

complete for in-game digital rewards. The characters are like a "reverse Tamagotchi", Avatars Global's Riley Malins told RNZ's Nine to Noon.

Reference 2 - 6.66% Coverage

Interactions with the avatar are gamified, he said.
"Individual tasks will be unique to each child depending on their individual needs. But we will have daily challenges, that could be run 2ks. And it will be a smartphone app, so your smartphone will track that you've run the 2ks, once you've hit start to tell it you're going for a run.
"And then once you've done that, it unlocks...it could be a new hat for your avatar or something more fantastical, like some flames coming out the eyes or something that kids would like."

â€œItâ€™s about using action sports to inspire kids to move more and build their confidence,â€ says Topfer.
Children can choose from five avatars - a skateboarder, a surfer, an inline skater, a BMX champion and a snowboarder. Parents will help configure the game experience specific to the needs of their child, offering activities for disabled and able-bodied children.The avatar will remember conversations with the child and give them tips on how to do physical exercise, like learning to skateboard. It will set them personalised challenges and reward them when they complete the challenge with digital and physical rewards.

"I see this as almost an underlying, base technology. At the moment when people think AI they see chatbots. I actually think that more and more we're going to see it integrated into the deeper, underlying layers of software. It's just going to enable us to do things that were previously very difficult or very time-consuming."
A

He said if teachers used AI to do the "heavy lifting", they could spend more of their time interacting with their students. "The more we explore and implement AI into the classroom, the more they're going to realise those time savings," he said.
Wang said one of the ways Kami used AI was to give teachers the ability to summarise and generate questions from curriculum material, check students' answers to those questions and provide them with feedback.

Reference 3 - 1.45% Coverage

The "real wins" of the technology to date included increasing teachers' productivity and potentially providing a teaching assistant for every student in a class, she said.

The premise was: What would the rainforest mycelium say if it could communicate with humans?
A method was needed to translate mycelium â€œlanguageâ€ into English, and Ferris and MacDonald initially planned a fictional artificial intelligence (AI) for the job.
â€œBut we thought, rather than us imagining what an AI would say, why donâ€™t we ... create an AI and have the AI write its own lines for the film,â€ Ferris said.

Simon McCallum is a senior lecturer of AI and computer science at Victoria University. He has heard of some consumers turning to the technology to make buying gifts easier. "AI can help open up your mind to other options that you hadn't considered, because it's another voice," he said. One way to do it is by providing the AI with information about the person you are buying for and asking for recommendations. AI

Reference 2 - 9.07% Coverage

However, it is not just gifts that AI can assist with. There are a myriad of uses that can make the festive season easier. Need a quick and easy Christmas card? Ask AI to generate one. Are you expecting guests with a variety of dietary requirements? Ask AI to help you plan a menu. Do you have a long drive with children looming? Simon McCallum has some ideas for you "I use the Chat CPT app on my phone, and I get my kids to play I Spy with it," he said. "It's very smart. You take a photograph, and it will try and guess what you're thinking of, so you can play endless I Spy with it."
