Reference 1 - 5.57% Coverage

In this â€œage of abundanceâ€ , a futuristic scenario where all the useful technological progress has been reached and all the inventions have been made, people would not need to work to maintain a lifestyle, but could opt to work as a leisure activity.
Such a â€œculture of leisureâ€ would prioritise â€œenjoyment and appreciation rather than usefulness and efficiencyâ€ , while medical nanobots would work to activate endorphins to make a person feel maximal pleasure, shape the body so that there was no need to
exercise daily, and edit the brain to quickly learn complex mathematical theorems.
