Reference 1 - 2.45% Coverage

Since AI systems can learn and adapt continuously from historical data, fraud detection capabilities are able to improve over time, allowing continuous improvements in identifying new fraudulent tactics as they emerge. This also helps to prevent false positives of legitimate transactions, minimising customer inconvenience.

Reference 1 - 3.93% Coverage

As the front end Bateâ€™s team uses Soul Machines, a company that develops AI assistants you can interact with as if they are a real person. Bate chooses an avatar, then pours in their knowledge base. â€œYou're basically saying â€˜You are this person. Your role is to do the following. This is how you'll behave.â€™ You tell the avatar what it is, what it's an expert in, how it behaves, how it interacts,â€ Bate says. â€œYou're not telling it what it knows, because it's plugged into the generative AI platform â€" Open AI, in this case â€" to construct that knowledge.

<Files\\Processed x Highly relevant\\2024-08-19 - TST - Caitlyn takes on role of growe> - § 1 reference coded [2.48% Coverage]

Reference 1 - 2.48% Coverage

Ask FAR was a good use case for the AI tool, Smith said, and because Caitlyn would learn when people asked questions and gave feedback, it was only going to get better.

<Files\\Processed x Highly relevant\\2024-08-23 - PST - AI could threaten $572m of NZ> - § 1 reference coded [1.99% Coverage]

Reference 1 - 1.99% Coverage

Judith Collins, the science, innovation and technology minister, said AI could be taught not to be biased. Humans were â€œnot so easy to trainâ€ , she said at Parliament on Thursday.

Reference 1 - 2.67% Coverage

Viticulture was a key market in New Zealand due both to its chemical-free appeal and the benefits of distinguishing one type of weed from another. â€œThey actually want clovers because, yes theyâ€™re weeds, but they actually fix nitrogen,â€ Ghamkhar said.

<Files\\Processed x Highly relevant\\2024-09-18 - WHC - Laser focus on killing farm we> - § 1 reference coded [6.07% Coverage]

Reference 1 - 6.07% Coverage

â€œThink of it like â€˜see and sprayâ€™ technology, but using lasers instead of spray. And, without the off-target damage to surrounding crop or pasture,â€ he said.

Map and Zap software could be programmed to what species it targeted. Trial results had been â€œoverwhelmingly positiveâ€ . It had currently been programmed to identify and zap 16 different species, with the potential to kill more, Ghamkhar said. â€œThe system is getting smarter ... itâ€™s reliable. Itâ€™s quite exciting.â€
He

<Files\\Processed x Highly relevant\\2024-10-30 - RNZ - NIWA turning to AI to forecast> - § 1 reference coded [12.04% Coverage]

Reference 1 - 12.04% Coverage

"NIWA's trying to stay at the front edge of that science and we're always looking at ways we can leverage the science and technology to make things either faster or more accurate."
At present, the AI model was trained for Westport only. This was because NIWA found they had a depth of data from Westport to use to train the AI and compare results to reality. "Obviously we'd love to be able to do this for the whole country," Fedaeff said.
NIWA is now focusing on whether the model needs to be retrained for each area of the country or if the model can use what it has learnt from Westport to develop forecasts for other areas.

<Files\\Processed x Highly relevant\\2025-04-17 - RNZ - Charity launches AI chatbot th> - § 1 reference coded [2.81% Coverage]

Reference 1 - 2.81% Coverage

The new chatbot was trained on custom data No Duff gathered during nine years of conversations with veterans. It would have a team of clinicians and researchers keeping an eye on it and crisis triggers for when to raise the red flag. It was still in the alpha stage - meaning more testing was needed before it was released to the wider veteran community.
